Continuation of Disposition of Claims: Claims subject to restriction and/or election requirement are 1,2,4-13,15,19-22,24,26-32,34-38 and 45-60.

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-2,4-13,15,19-22,24,26-32,34-38,45-54, are drawn to creating a http tunnel without receiving from the intermediate server computer a response including a connection identifier corresponding to a first return path, classified in class 709, subclass 227.
- II. Claims 55-60, are drawn to receiving from the intermediate server computer a response including a connection identifier corresponding to a first return path, classified in class 709, subclass 239.

Inventions I are II related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct if they do not overlap in scope and are not obvious variants, and if it is shown that at least one subcombination is separately usable. In the instant case, subcombination II has separate utility such as receiving from the intermediate server computer a response including a connection identifier corresponding to a first return path. See MPEP § 806.05(d).

The examiner has required restriction between subcombinations usable together. Where applicant elects a subcombination and claims thereto are subsequently found allowable, any claim(s) depending from or otherwise requiring all the limitations of the allowable subcombination will be examined for patentability in accordance with 37 CFR 1.104. See MPEP § 821.04(a). Applicant is advised that if any claim presented in a continuation or divisional application is anticipated by, or includes all the limitations of, a claim that is allowable in the present application, such claim may be subject to

provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application.

Because these inventions are independent or distinct for the reasons given above and there would be a serious burden on the examiner if restriction is not required because the inventions have acquired a separate status in the art due to their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

In addition in reviewing applicant arguments received 10/19/2006, applicant starting on page 16, agrees with the examiner that claim 55-60 are directed toward a different invention.
